Develop Your Data Mindset: Essentials of Educational Data Use Module 3 - Aligning Answerable Questions With School Initiatives

This document includes discussion questions relevant to Module 3 of *Develop Your Data Mindset: Essentials of Educational Data Use*. The questions may help guide individual reflections or group discussions with pre-service or in-service educators following completion of Module 3. Discussion questions for consideration are as follows:

- What are examples of school initiatives that require data use?
- What are examples of summative assessment data collected in school settings?
- What are examples of formative assessment data collected in school settings?
- What are examples of interim assessment data collected in school settings?
- What are examples of general questions that may be answered with data in educational settings? What type(s) of data would be required to answer each question?
- What are example operational versions of general questions that may be answered with data?
- What are examples of using individual student-level data for summative purposes?
- What are examples of using individual student-level data for formative purposes?
- What are examples of using classroom-level data for summative purposes?
- What are examples of using classroom-level data for formative purposes?
- What are examples of using school or district-level data for summative purposes?
- What are examples of using school or district-level data for formative purposes?
