Statewide Longitudinal Data System

Assessment Dashboard

Are you looking for a place to see individual student's historical assessment data? The Assessment Dashboard in the Student Roster can give you just that. It is a "running record" of all interim and formal assessments that a student has taken since enrolling in a North Dakota public school system.

The school must be using PowerSchool to obtain records

- How does the student's assessments compare to classroom performance?
- Does the trend show a need for intervention implementation/MTSS?
- Is the student showing College readiness when looking at ACT?

Missing Data?

Not seeing data for these 4 assessments within the SLDS?

- AIMS
- NWEA
- STAR
- FAST Bridge

This could mean that a data share agreement is not in place OR a possible rostering issue within the vendor site.

Once a data sharing agreement is signed, it will be on file unless you ask for it to be removed, with the exception of AIMSPlus which requires annual release.
